- reaction time / trigger speed 0.4 seconds

- audio: enables the recording of sounds
- data in the picture: date, time, temperature, moon phase and battery

- app and online monitoring of the battery and last „keep alive“
- size: height: 14 cm, width: 6 cm, length: 10 cm 640 x 480 (VGA)

Some examples on where to use the PestCam

Have a look
inside the
sewage system

Monitor
areas which
are not easy
to access

Know if
you have
unpleasant
visitors

See what
is going on
around your
bait stations

The first camera for digital pest control

Permanent monitoring 24/7

The eMitter® Pestcam is suitable for continuous operation. However, the built-in timer allows you to switch between day and night operation, deactivating the camera when it is not needed. This saves energy and extends battery life. These are of course rechargeable.

Waterproof

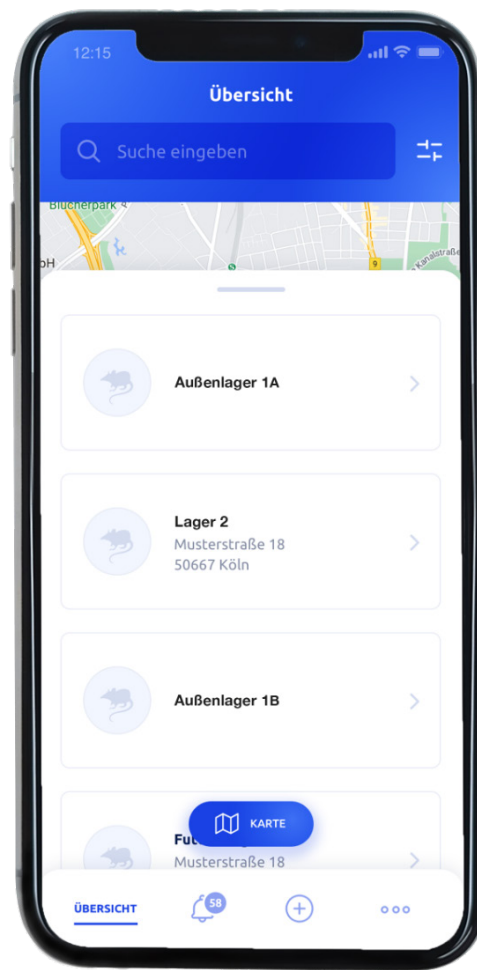

The PestCam is waterproof and therefore also suitable for outdoor use.

Photos plus videos

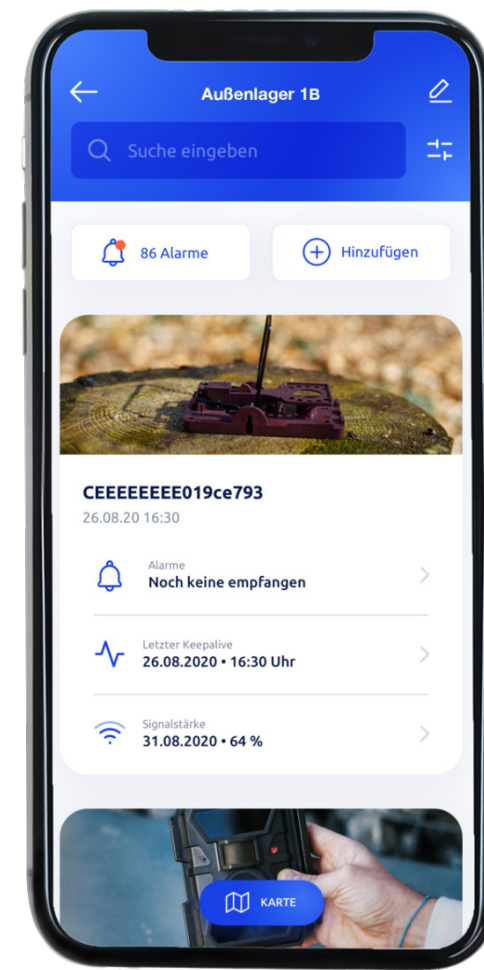

You will receive up to 5 photos a day if something moves. The 32GB SD card stores all pictures and in addition to each picture a 20 second video with sound.

eMitter[®] App

Create and manage

In the central office you can easily create, change and manage all eMitter products.

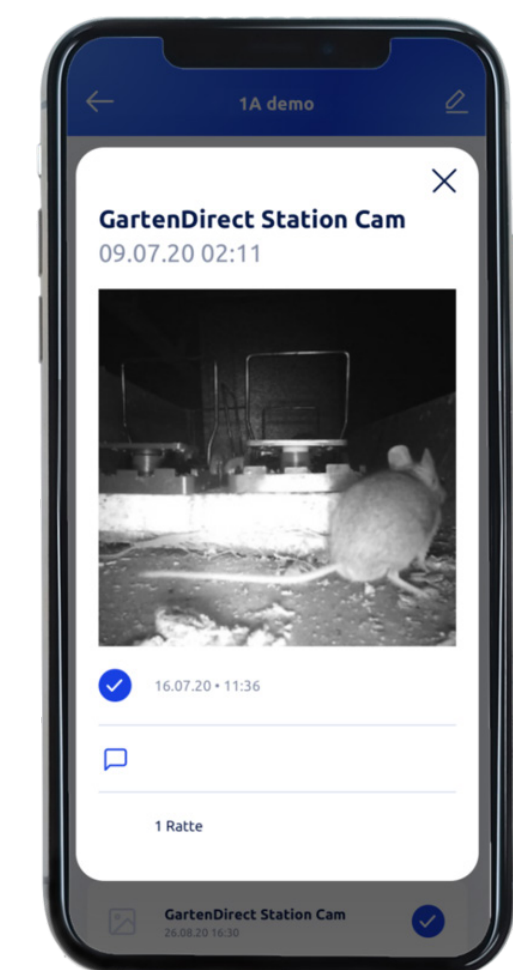

Overview

Keep an overview of all traps, transmitters, routers and controllers installed at your customers.

Control

Check anytime and anywhere if anything has changed in your traps.

Photos

Get pictures taken by the PestCam directly to your smartphone.

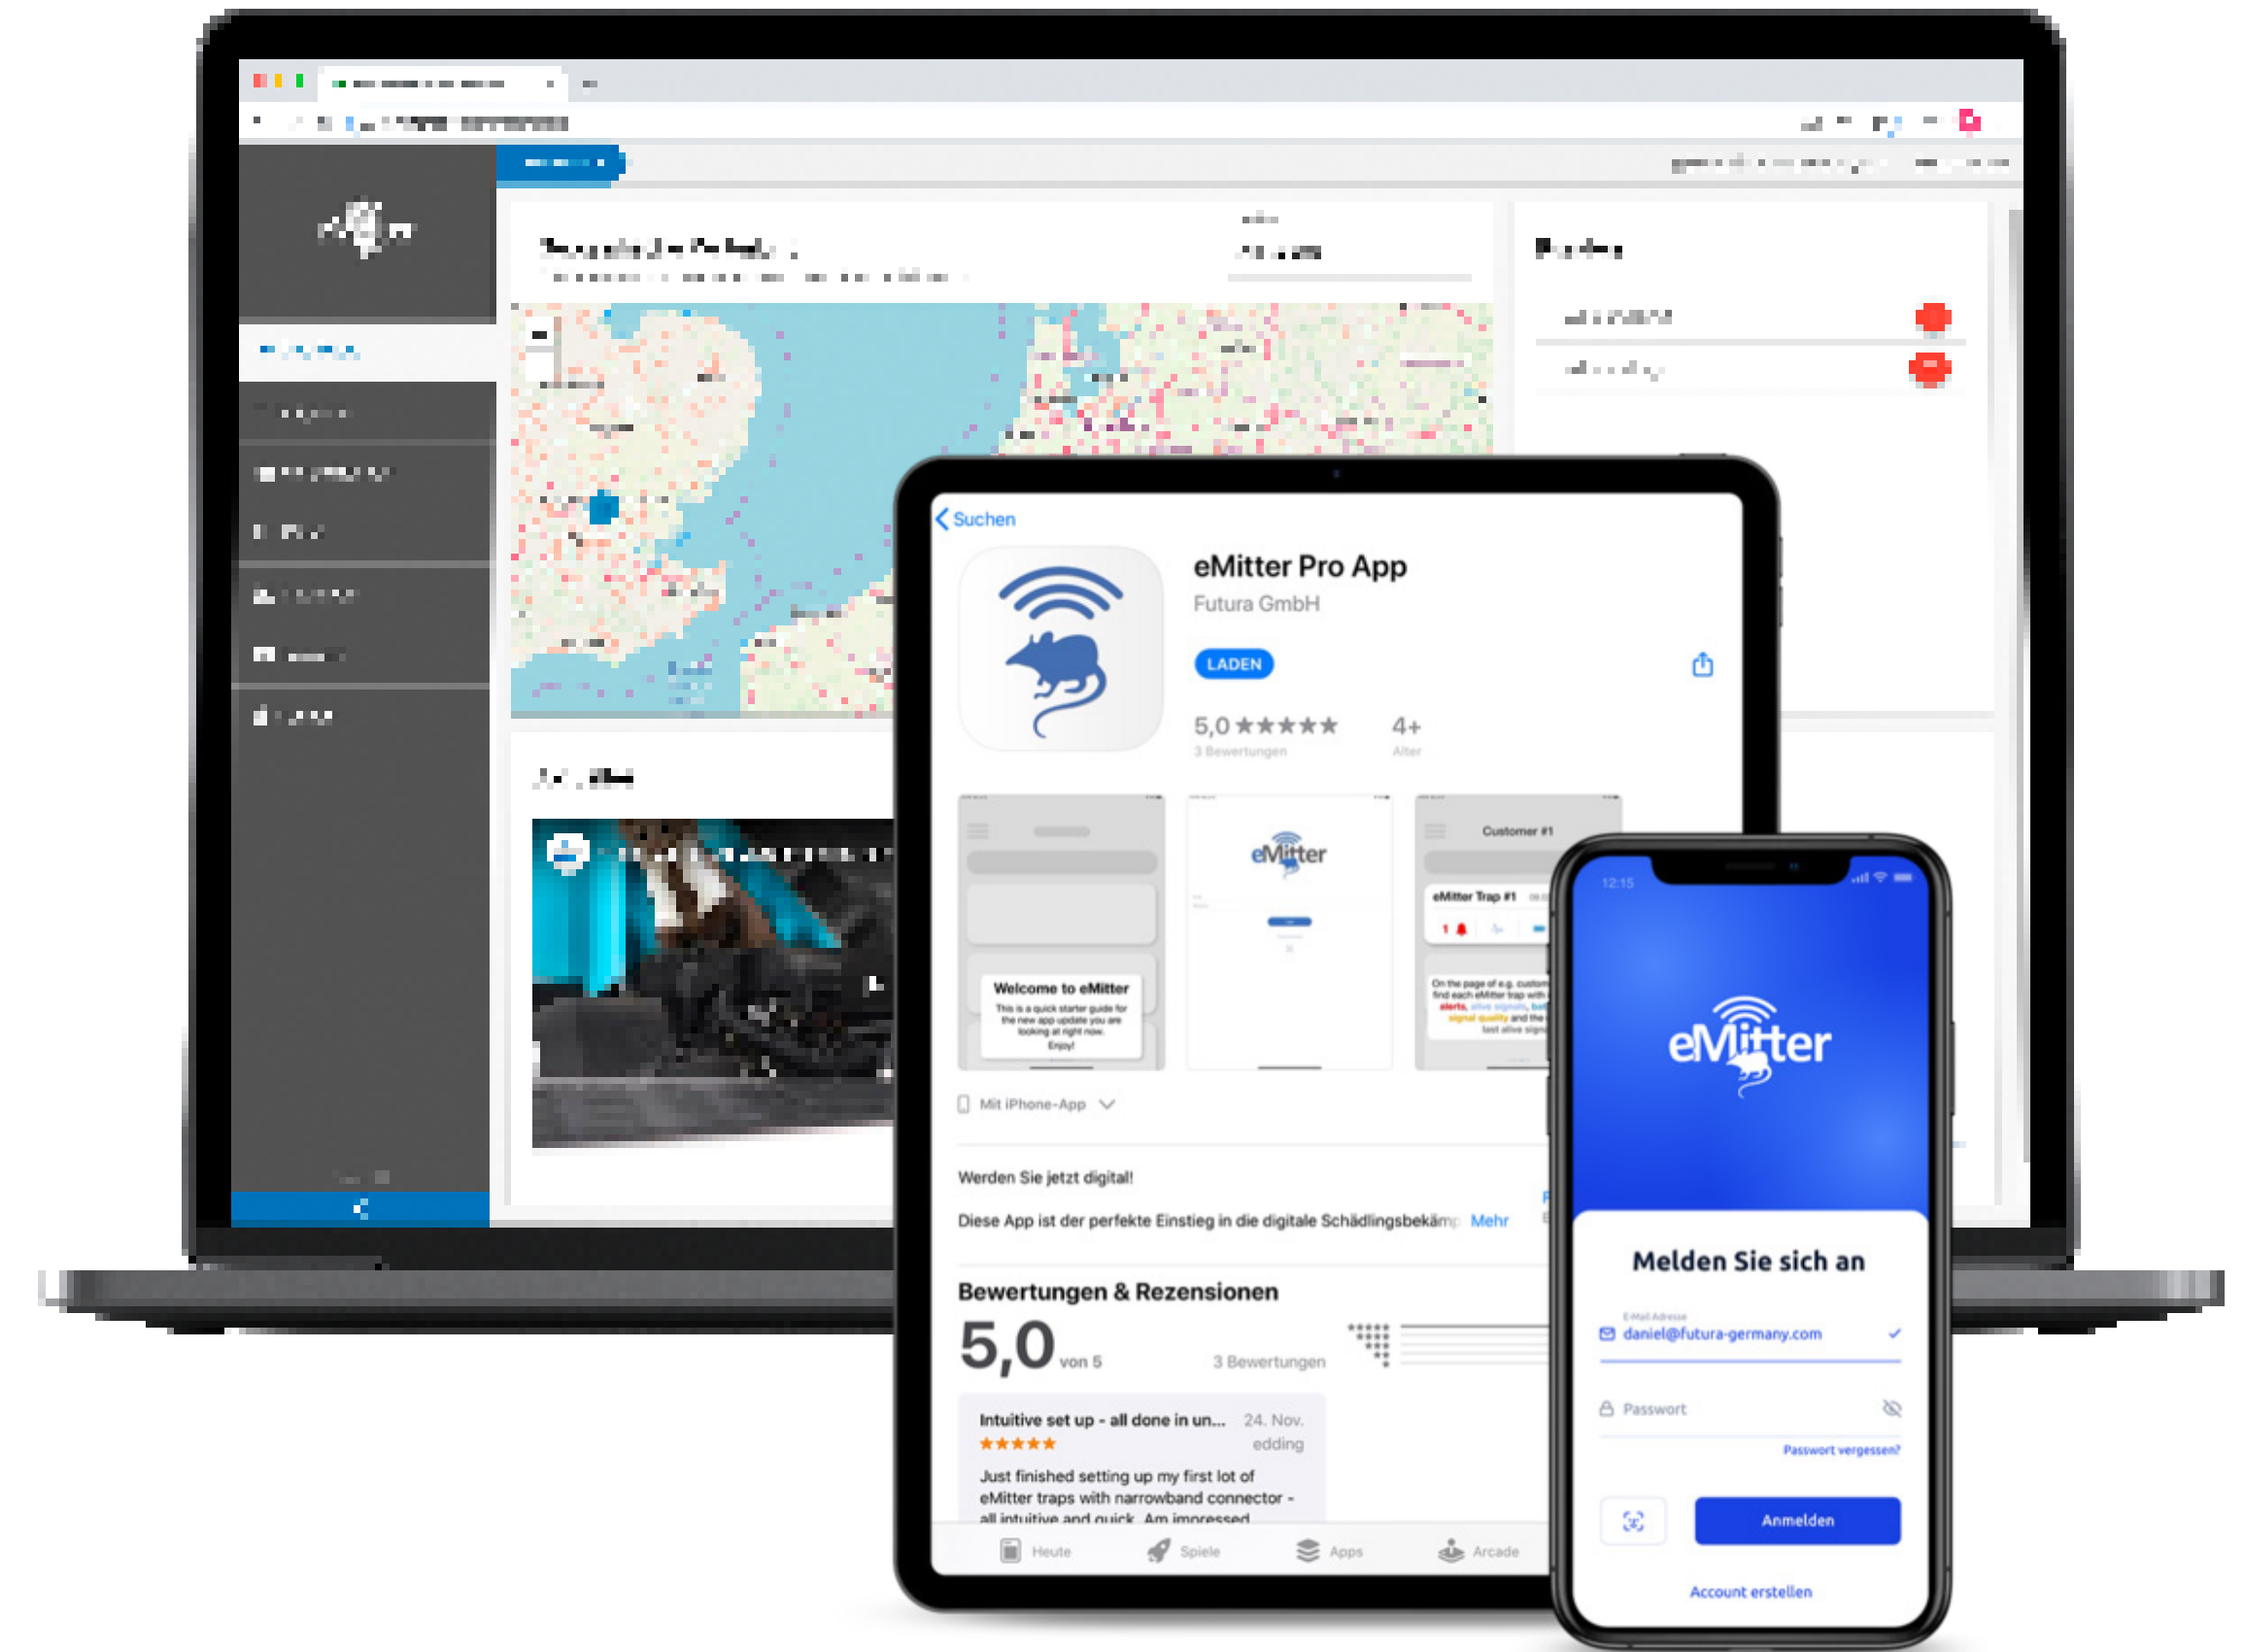

eMitter[®] online portal

Administration, evaluation, statistics

The eMitter[®] online portal offers everything that high-profile demanding companies expect.

It is characterized above all by its simple operation. Here customers are managed, it's characterized by it's simple use, infestation reports are retrieved, statistics are viewed and much more. The integration of the individual components such as traps and controllers is easily done on site via app.
